

# CloudShark Enterprise

Solve problems faster with network captures from your ntop systems

## What is CloudShark Enterprise?

- ✓ Packet capture archive and analysis tool
- ✓ On-premise virtual appliance
- ✓ Works in any browser
- ✓ Instant Suricata security analysis
- ✓ Makes collaboration easy

## ntop + CloudShark

When troubleshooting a **network** or **security** event, ntop's **nBox** and **n2disk** are **best-in-class** systems for recording network data.

By adding **the leading application** for analyzing **packet captures**, you'll **solve problems** faster, **feel secure** about your IT assets, and **save time and money** without wrestling with open source software. .

## How does it work?

Seamless integration with nBox and n2disk
